YOUR PROGRESS WITH THE G.R.A.S.S. SELECTION INDEX

| Area of benefit | Results achieved in 10 years |
|---------------------|------------------------------|
| • Ewe CFW | +0.57kg |
| • Ewe FD | -0.4µm |
| • Hogget BW | +3.0kg |
| • Staple Strength | +1.2N/Kt |
| • Reproduction rate | +1.6% |

Over the next 10 years, users of G.R.A.S.S. rams should achieve these results from the selection index. If you have previously been buying rams from a non-index performance selection stud, then your first five year gains could be much greater than those listed above.

These extra profits are essential to keep your flock and farm profitable.
